As well as one to one support, we offer professional placement training for all our Placement Year students.

Your placement training will be embedded in years 1&2 of your course and will include a series of interactive and immersive sessions run by the careers and placement team, academic staff and employers.

The Professional Placement training will help you to;

- **Be inspired** by returning placement students who will share their stories and top tips
- **Learn** how to explore placement options and search for opportunities that suit your skills and interests
- **Build your** placement ‘toolkit’ including CVs, LinkedIn profile, applications, cover letters
- **Practice** to get you in a position of readiness for your recruitment tests, interviews and assessment centres
- **Get ready** for the placement experience itself and learn some professional skills to help you hit the ground running

**Professional Placement Training** is important and your attendance at each session is crucial not only to ensure that you are ready for the fierce competition ahead, but that you are fully prepared for when you start!
